SHENZHEN LINSN LED CO.,LTD.

MX500/1000 Series LED Display

Available in 500×500mm and 500×1000mm Sizes

The 500×500mm and 500×1000mm MX series LED display cabinets are dimensionally compatible for seamless integration, enabling flexible, creative, and irregular splicing, perfectly tailored for stage and event setups.

Quick and Easy Installation

Equipped with fast locks and ergonomic handles on all sides, the cabinet enables quick installation and removal, perfectly meeting the demands of rapid setup and dismantling in rental applications.

Optimized Internal Structure

The MX Series features a fanless die-cast aluminum cabinet for quiet operation and natural heat dissipation. The power box features a hard-wired plug-and-play design with a large switch-style lock for easy operation. Its high-efficiency PFC power supply ensures energy savings.

Superior Visual Performance

The MX Series delivers superior visual performance with high-definition display quality, featuring a refresh rate of $\geq 3840\text{Hz}$ and a 14-bit grayscale level. This high-grayscale, high-refresh-rate design ensures clear, flicker-free displays with vibrant, rich colors.

Corner-Protected Design

The cabinet features built-in corner protection combined with bottom-edge reinforcement, effectively shielding the LED modules from impact during handling and transportation, significantly enhancing overall anti-collision performance.

Seamless Splicing with Perfect Visual Experience

It supports pixel-level brightness and color calibration, ensuring consistent brightness and color across the screen. The unit has built-in temperature and voltage monitoring, with dual backup configuration for added reliability in after-sales support.

High Quality With Global Standards,
CE EMC, RoHS, FCC Certificated.
